

An Iowa Agriculture Publication For Students:

FROM THE GROUND UP

FARM ANIMALS

The hair on the neck of a horse is called a mane. Their babies are called foals.

Sheep have wool covering their body. The farmer shears the wool and we use it to make clothing and blankets.

We get milk from dairy cows and meat from beef cattle. Both like to eat hay.

A pig has a snout instead of a nose like you!

Chicks hatch from eggs that mother hens lay.

What do farm animals eat?

Write SOYBEANS here.

Write CORN here.

Draw your own farm animals!

Draw a farm animal with
four legs.

Draw a farm animal with
feathers.

Draw a farm animal that
needs food and water.

This issue of From the Ground Up has been provided by North Central Iowa Ag in the Classroom. For more information about agriculture education contact your county Farm Bureau office or visit www.nciagintheclassroom.org
