

ELEMENTARY DIVISION

Rules:

Before beginning, have students complete the [Pre-Inventory Survey](#). Once projects have been completed, students should complete the [Post-Inventory Survey](#).

Students must select a turkey recipe and then work together in teams of three or more, or as a classroom, to submit a poster that advertises the recipe and showcases the health benefits associated with eating turkey. Ideas can include but are not limited to a specific cut of turkey, a stand-alone product, grab and go meals that include turkey, a turkey entrée that would be on school lunch menu, served at a senior citizen center, or even at an upscale restaurant.

All posters must be two dimensional. Posters may be designed electronically or in hard copy. If hard copy, the maximum size of the poster board is 22" x 28". Hard copy posters should be scanned or photographed to make an electronic copy. Electronic files (photos, scans, or digitally created files) will be submitted through an [online form](#).

Computer aided graphics must be of original design. Use of trademarked or copyrighted material will be grounds for disqualification. If you choose to use clip art or other graphics, please ensure that they are in the public domain.

All posters will be scored using the following criteria:

- Does the poster identify and promote a turkey recipe?
- Does the poster show originality by the group?
- Does the poster show evidence of research and learning about turkey?
- Does the poster accurately reflect and portray turkey nutrition information?
- Is the poster neat and visually pleasing?

For a detailed description of how judges will score projects, please refer to the [elementary division rubric](#).
